SUMMARY

Passionate Computer Science student and startup builder currently developing Outfevibe, a fashion-tech platform focused on personalized outfit discovery and AI-powered fashion experiences. Skilled in frontend development, UI/UX design, and integrating AI technologies into real-world products. Experienced in building projects independently under limited resources while continuously learning modern technologies and product development workflows.

PROFESSIONAL EXPERIENCE

CEO & Founder — Outfevibe 02/2026 – Present

Meerut, India

- Founded and led the development of Outfevibe, a fashion-tech platform focused on personalized outfit discovery and AI-powered fashion experiences.
- Managed all aspects of product development, from ideation and UI/UX design to frontend implementation and AI integration.
- Utilized Next.js, Tailwind CSS, and Gemini AI to build and launch the platform independently during the second year of B.Tech studies.

Build Outfevibe (Core Development) 02/2026 – Present

Deep Tech & Personalization Features

- Revolutionized fashion discovery by developing Outfevibe, an AI-powered platform for personalized outfit recommendations based on body shape, skin tone, and aesthetics.
- Designed and implemented the "Discover My Fit" scrolling experience, enhancing user engagement and exploration of fashion suggestions.
- Spearheaded the integration of AI to deliver tailored fashion advice and virtual wardrobe planning features.
- Enabled users to explore diverse fashion aesthetics, significantly improving their personalized style journey.

PROJECTS

Outfevibe Platform Landing Architecture Ongoing

<https://www.outfevibe.com>

- Founded and developed a fashion-tech platform to provide personalized outfit discovery and AI-powered fashion experiences.
- Engineered the frontend using Next.js and Tailwind CSS to create a responsive and modern user interface.
- Integrated Gemini AI to power intelligent features and enhance user engagement.

Digital Student Portfolio

10/2025

<https://digital-student-portfolio.vercel.app>

- Developed a Digital Student Portfolio (DSP) platform to enable students to securely upload and manage academic documents, project work, extracurricular activities, and experiences.
- Designed and implemented a user-friendly interface for seamless uploading and organization of diverse student assets, including marksheets, certificates, and project portfolios.
- Integrated Vercel for continuous deployment, streamlining the development and release cycles.
- Enhanced student profiles by providing a centralized repository for showcasing achievements and skills to potential employers or academic institutions.

Personal Portfolio

10/2026

<https://gungun-portfolio-nu.vercel.app>

- Developed a modern, animated personal portfolio website utilizing React, Next.js, and Framer Motion to showcase 10+ projects, skills, and startup journey, enhancing personal brand visibility.
- Optimized site for SEO and responsiveness, achieving a 30% increase in organic traffic and a 20% improvement in load times, effectively presenting a professional online presence to potential employers and collaborators.
